Cadaqués

Cadaqués

Description

The "Cadaqués" is inspired by the fascinating history of the former fishing village in Catalonia. This lamp has tried to capture the beauty of the village. The lamp is made of beech wood and finished with a front and back of perspex in the color black or white. The built-in dimmer ensures that the light intensity can be adjusted to the desired atmosphere. The Cadaqués is satisfied with a modest place in the home or office and will, like the fishing village, always be present without really noticing. The Cadaqués is available in the colors black, white and granite and is equipped with a fabric cord with black bakelite plug.
